Love your Quick Set Pool but frustrated with it's performance?

- Cloudy water.
- Algae growing.
- Pump and filter doesn't circulate enough water.
- Chemicals are not balancing your water.

We offer:

- Free water testing & analysis.
- A wide selection of quality pool chemicals, maintenance equipment and accessories.

Common problems associated with soft sided pools such as INTEX or Quick Set brands:

The pump and filter is too small and doesn't circulate enough water causing the water to be dirty, cloudy and form green algae. We have the solution to keep your water crystal clear and much easier to clean with a pump and filter upgrade.

Trust the experts at Patio Pleasures Pools & Spas.

Not all chemicals are created equal.

The big box brands formulate with fillers and your chemicals work 5—10 times harder to achieve balanced clean water.
